Subject: Thank you for your help with the F401 website!

Colin,

I'm noticing that I never did properly thank you for your assistance with the F401:Survey or Serious Games website last year and I'd like to take a moment to remedy this situation. Your willingness to help out is amazing—particularly since you have so many strong skills to share with your colleagues. It was great to have the opportunity to actually work with a professional graphic designer that listened to my request and synthesized multiple approaches. Furthermore, you never hesitated to build new mockups for me based upon further requests and you never hesitated in explaining the rationale behind your design either. On top of all this, your turnaround on implementing your prototype in the live environment was nothing short of amazing, especially with respect to the advertisement flyers to promote the course and the slide for W200. These latter were requested after the fact with a short timeframe and yet you managed to get them done anyway.

Thank you for providing such a professional level of service on a voluntary basis.

Micah
